Dear

In my role to secure our company, the human element is the largest attack vector. To further my knowledge regarding this expansive attack surface, I would like to attend the **Practical Application of Social Engineering (PASE)** training course sponsored by Social-Engineer, LLC. This course takes place on
I am seeking sponsorship for the cost of attending the course.

This specialized course offers four days full of content that immerses you in the world of social engineering. Each day consists of instructor-led demonstrations and live exercises with actual human targets. At the end, I will be given an opportunity to test my knowledge and take the Certified Ethical Social Engineer (CESE) certification test. I will be provided with learning materials, access to a customized Public Branch Exchange (PBX) client and a virtual desktop environment for use during the class.

COSTS

Below is a breakdown of the total costs involved in my attending the **Practical Application of Social Engineering (PASE)** training course:

• Course:

This course is presented virtually via Zoom Video Conferencing, so no travel is required.

If I attend, I will gain an unparalleled opportunity to learn, communicate and employ the knowledge and insights needed to protect our company from these emerging threats. Additionally, the networking opportunities will allow me to develop important relationships with others in similar positions and the world's leading cybersecurity and social engineering experts. This makes my attendance at the **Practical Application of Social Engineering (PASE)** a wise investment.

Thank you for your consideration of this request.

Sincerely,
