# ELEVATE YOUR DEFENSE AGAINST THE HIDDEN THREATS OF SMS PHISHING

In today's digital-first world, SMS phishing, or SMiShing, has emerged as a formidable challenge, exposing organizations to unprecedented risks. As attackers refine their strategies, both corporate-owned and personal (BYOD) devices within your network become prime targets, leaving your critical data vulnerable to exploitation.

## Introducing Our Premier Managed SMiShing Service

A strategic solution engineered to fortify your frontline defense by enhancing awareness and reporting while significantly reducing risk and susceptibility to attacks. This program is tailored to transform how your employees perceive and respond to the sophisticated text-based phishing threats they face daily.

### Core Features of Our Managed SMiShing Service

☑ **Customized Simulation Templates:** Engage your team with custom-designed SMiShing scenarios that mirror real-world threats, crafted to test and enhance their vigilance.

☑ **Data-Driven Targeting & Training:** Utilize the power of actionable insights to focus your training efforts where they are needed most, ensuring a smarter, data-informed approach to employee education.

☑ **Comprehensive Reporting Metrics:** Access detailed analytics and reports that provide a deep dive into your organization's response patterns, highlighting strengths and pinpointing areas for improvement.

☑ **Enterprise Scalability:** Confidently scale your defense mechanisms across the entirety of your organization, ensuring uniform awareness and preparedness against SMiShing attacks, regardless of size or complexity.

### Embark on a Journey to Unparalleled Security with Our 90-Day Paid Pilot Program

Experience firsthand the transformative impact of our Managed SMiShing Service. Within 90 days, witness a tangible shift in your organization's ability to detect, report, and counteract SMiShing attempts. Our dedicated support and continuous refinement process guarantee a robust defense mechanism, tailor-made for your unique environment.

### Protect Your Organization. Empower Your Employees.

In the battle against SMiShing, knowledge and preparedness are your best allies. Equip your team with the tools and confidence to identify and neutralize threats before they compromise your security.
